## Key Takeaways

- Remember the Three-Step Process
- Use Your Resources
- Use Detailed Explanations

## Chapter 1: Understanding Validation Edits

### What Are Validation Edits?

- Validation edits are intended to further improve the quality of data used in state loss cost and rate filings as well as in the production of experience ratings
- Each validation edit is assigned a Type Code, a unique identifier that leads with a letter:
  - “E” for exposure validation edits (e.g., E133)
  - “L” for loss validation edits (e.g., L108)
  - “C” for combined edits (e.g., C821)
  - “A” for all header validation edits
- Each validation edit is assigned a Data Grade 2 (Suspect)

### Validation Edit Types

- Submission
  - Automatically identifies suspect data upon receipt
- Post-Submission
  - NCCI validators identify suspect data while reviewing Unit Data that has already been received

### Identifying Validation Edits

Use these reports to find and manage your validation edits.

Report or Alert	Submission	Post-Submission
Unit Submission Results Report	✓	
Unit Daily Submission Results Report	✓	
Outstanding Suspect Conditions Report	✓	✓
Rejected Suspect Condition Explanations	✓	✓
Post-Submission Suspect Conditions Report		✓

- You can find the Unit Submission Results Report and the Unit Daily Submission Results Report in the **Unit Data Collection (UDC)** tool
- NCCI sends the Outstanding Suspect Conditions Report and Rejected Suspect Condition Explanations by email to the unit contact every Friday morning
- NCCI sends the Post-Submission Suspect Conditions Report out nightly when new edits are created

### Chapter 2: 3-Step Process to Address Unit Validation Edits

#### Identify Your Validation Edits

- Use the Validation Search in **UDC** as your starting point.
- Use these key fields to prioritize your edits:
  - Condition Status
  - Due Date

#### Research Validation Edits

- Select the Details option via the Validation Search in **UDC**
- Review the suspect data on the unit to determine if it needs a correction

#### Resolve Validation Edits

Resolve the edit by:

- Correcting the data, or
- Providing a detailed explanation using the Explanation Journal option

#### Validation Submission Edit Workflow

1. Identify—You can use any of these options to identify the edits
  - a. Data Reports
  - b. **UDC** Validation screen
  - c. **Data Manager Dashboard**
2. Research—Follow these steps to determine the cause of the issue:
  - a. Review your source system to verify that the data is accurate
  - b. For edits that look across multiple report levels, view the history of the claim in **UDC** to see what changed
  - c. Refer to the **Statistical Plan** and **Unit Statistical Reporting Guidebook** for clarification and examples of the reporting rules
  - d. Check the Edit and Validation Matrix for additional information pertaining to the edit
3. Resolve—Resolve the edit using the applicable option
  - a. Correct inaccurate data at the appropriate report levels. You can use **UDC** or **Data Transfer via the Internet (DTVI)**
  - b. Respond with a detailed explanation on the **UDC** Validation screen if the data is correct

#### Notes:

- You may need to provide both corrections and a detailed explanation. In these circumstances, submit the corrections first and then add explanations.
- Research a unit again if your validator requests additional information.

- o Injury Type 09 (Permanent Partial) reported at 1st and 2nd level
- o Injury Type 05 (Temporary Total or Temporary Partial) reported at 3rd report
- Additional research in the source system determines:
  - o Permanent partial disability reserves set up initially for possible surgery
  - o Claimant opted for physical therapy and no longer required surgery
  - o Later, claimant opted out of surgery, and injury was determined to be less severe than anticipated
- Determination—The loss development is correct as reported

### 2. Provide a detailed verification for the payroll increase after corrections are submitted:

The payroll increase reported in CC2095 was on an account of an acquisition in 2021. The acquisition added more payroll in CC2095 in particular.

Notice that at 3rd report level:

- Gross incurred losses are lower, and
- There is a Recovery Type Code

We will need to check with the carrier's claims department to determine if the recovery is accurate.

## Data Now Program (DNP) Addressing Unit Validation Edits

### Resolve

Assume that the claims department verifies that the recovery is correct. We need to submit corrections to the 1st and 2nd reports to:

1. Reduce the incurred and paid losses to their appropriate values, and
2. Add Recovery Code 03

- Recovery Type Code is 01 at 2nd report

Check with the carrier's claims department to determine if a recovery was received for this claim.

## Data Now Program (DNP) Addressing Unit Validation Edits

### Resolve

Assume that the claims department verifies that there is no recovery associated with this claim. Submit corrections to the 1st report to remove the recovery code.
