### Key Takeaways

- Remember the Three-Step Process
- Use Your Resources
- Use Detailed Explanations

### Chapter 1: Understanding Validation Edits

#### What Are Validation Edits?

- Validation edits are intended to further improve the quality of data used in state loss cost and rate filings as well as in the production of experience ratings
- Each validation edit is assigned a Type Code, a unique identifier that leads with a letter:
  - “E” for exposure validation edits (e.g., E133)
  - “L” for loss validation edits (e.g., L108)
  - “C” for combined edits (e.g., C821)
  - “A” for all header validation edits
- Each validation edit is assigned a Data Grade 2 (Suspect)

#### Validation Edit Types

- Submission
  - Automatically identifies suspect data upon receipt
- Post-Submission
  - NCCI validators identify suspect data while reviewing Unit Data that has already been received

#### Identifying Validation Edits

Use these reports to find and manage your validation edits.

Report or Alert	Submission	Post-Submission
Unit Submission Results Report	✓	
Unit Daily Submission Results Report	✓	
Outstanding Suspect Conditions Report	✓	✓
Rejected Suspect Condition Explanations	✓	✓
Post-Submission Suspect Conditions Report		✓

- You can find the Unit Submission Results Report and the Unit Daily Submission Results Report in the **Unit Data Collection (UDC)** tool
- NCCI sends the Outstanding Suspect Conditions Report and Rejected Suspect Condition Explanations by email to the unit contact every Friday morning
- NCCI sends the Post-Submission Suspect Conditions Report out nightly when new edits are created

### Chapter 2: 3-Step Process to Address Unit Validation Edits

#### Identify Your Validation Edits

- Use the Validation Search in **UDC** as your starting point
- Use these key fields to prioritize your edits:
  - Condition Status
  - Due Date

#### Research Validation Edits

- Select the Details option via the Validation Search in **UDC**
- Review the suspect data on the unit to determine if it needs a correction

#### Resolve Validation Edits

Resolve the edit by:

- Correcting the data, or
- Providing a detailed explanation using the Explanation Journal option

#### Validation Submission Edit Workflow

1. Identify—You can use any of these options to identify the edits
  - a. Data Reports
  - b. **UDC** Validation screen
  - c. **Data Manager Dashboard**
2. Research—Follow these steps to determine the cause of the issue
  - a. Review your source system to verify that the data is accurate
  - b. For edits that look across multiple report levels, view the history of the claim in **UDC** to see what changed
  - c. Refer to the **Statistical Plan** and **Unit Statistical Reporting Guidebook** for clarification and examples of the reporting rules
  - d. Check the Edit and Validation Matrix for additional information pertaining to the edit
3. Resolve—Resolve the edit using the applicable option
  - a. Correct inaccurate data at the appropriate report levels; you can use **UDC** or **Data Transfer via the Internet (DTVI)**
  - b. Respond with a detailed explanation on the **UDC** Validation screen if the data is correct

#### Notes:

- You may need to provide both corrections and a detailed explanation. In these circumstances, submit the corrections first and then add explanations.
- Research a unit again if your validator requests additional information.

- Injury Type 09 (Permanent Partial) reported at 1st and 2nd level
  - Injury Type 05 (Temporary Total or Temporary Partial) reported at 3rd report
- Additional research in the source system determines:
  - Permanent partial disability reserves set up initially for possible surgery
  - Claimant opted for physical therapy and no longer required surgery
  - Later, claimant opted out of surgery, and injury was determined to be less severe than anticipated
- Determination—The loss development is correct as reported

Notice that at 3rd report level:

- Gross incurred losses are lower, and
- There is a Recovery Type Code

We will need to check with the carrier's claims department to determine if the recovery is accurate.

## Data Now Program (DNP) Addressing Unit Validation Edits

### Resolve

Assume that the claims department verifies that the recovery is correct. We need to submit corrections to the 1st and 2nd reports to:

1. Reduce the incurred and paid losses to their appropriate values, and
2. Add Recovery Code 03

- Recovery Type Code is 03 at 1st report
- Recovery Type Code is 01 at 2nd report

Check with the carrier's claims department to determine if a recovery was received for this claim.

## Data Now Program (DNP) Addressing Unit Validation Edits

### Resolve

Assume that the claims department verifies that there is no recovery associated with this claim. Submit corrections to the 1st report to remove the recovery code.

Claim Nbr	Accident	Rpt Nbr	Corr Seq	Class Code	Claim Status	Inj Type	Cat Nbr	Claim DG	Incur Indem	Pd Indem	Incur Med	Pd Med

1. The correction changes the Type of Recovery Code to 01. This change clears the edit.
